

Google Cloud Platform: Landing Zone

New York USA

London UK

Munich Germany

Zug Switzerland

Challenges We Help to Solve

GCP Organization Governance

Set policies to ensure that data's security, privacy, accuracy, availability and usability.

Cloud Economics

Identify mismanaged or idle resources, utilize heat maps, and consider other solutions to leverage cloud capabilities.

DevOps as a Service

Migrate tools and processes for continuous delivery to a hosted virtual platform.

Cloud Adoption

Review, design, and implement your cloud journey.

DataArt Landing Zone Offering

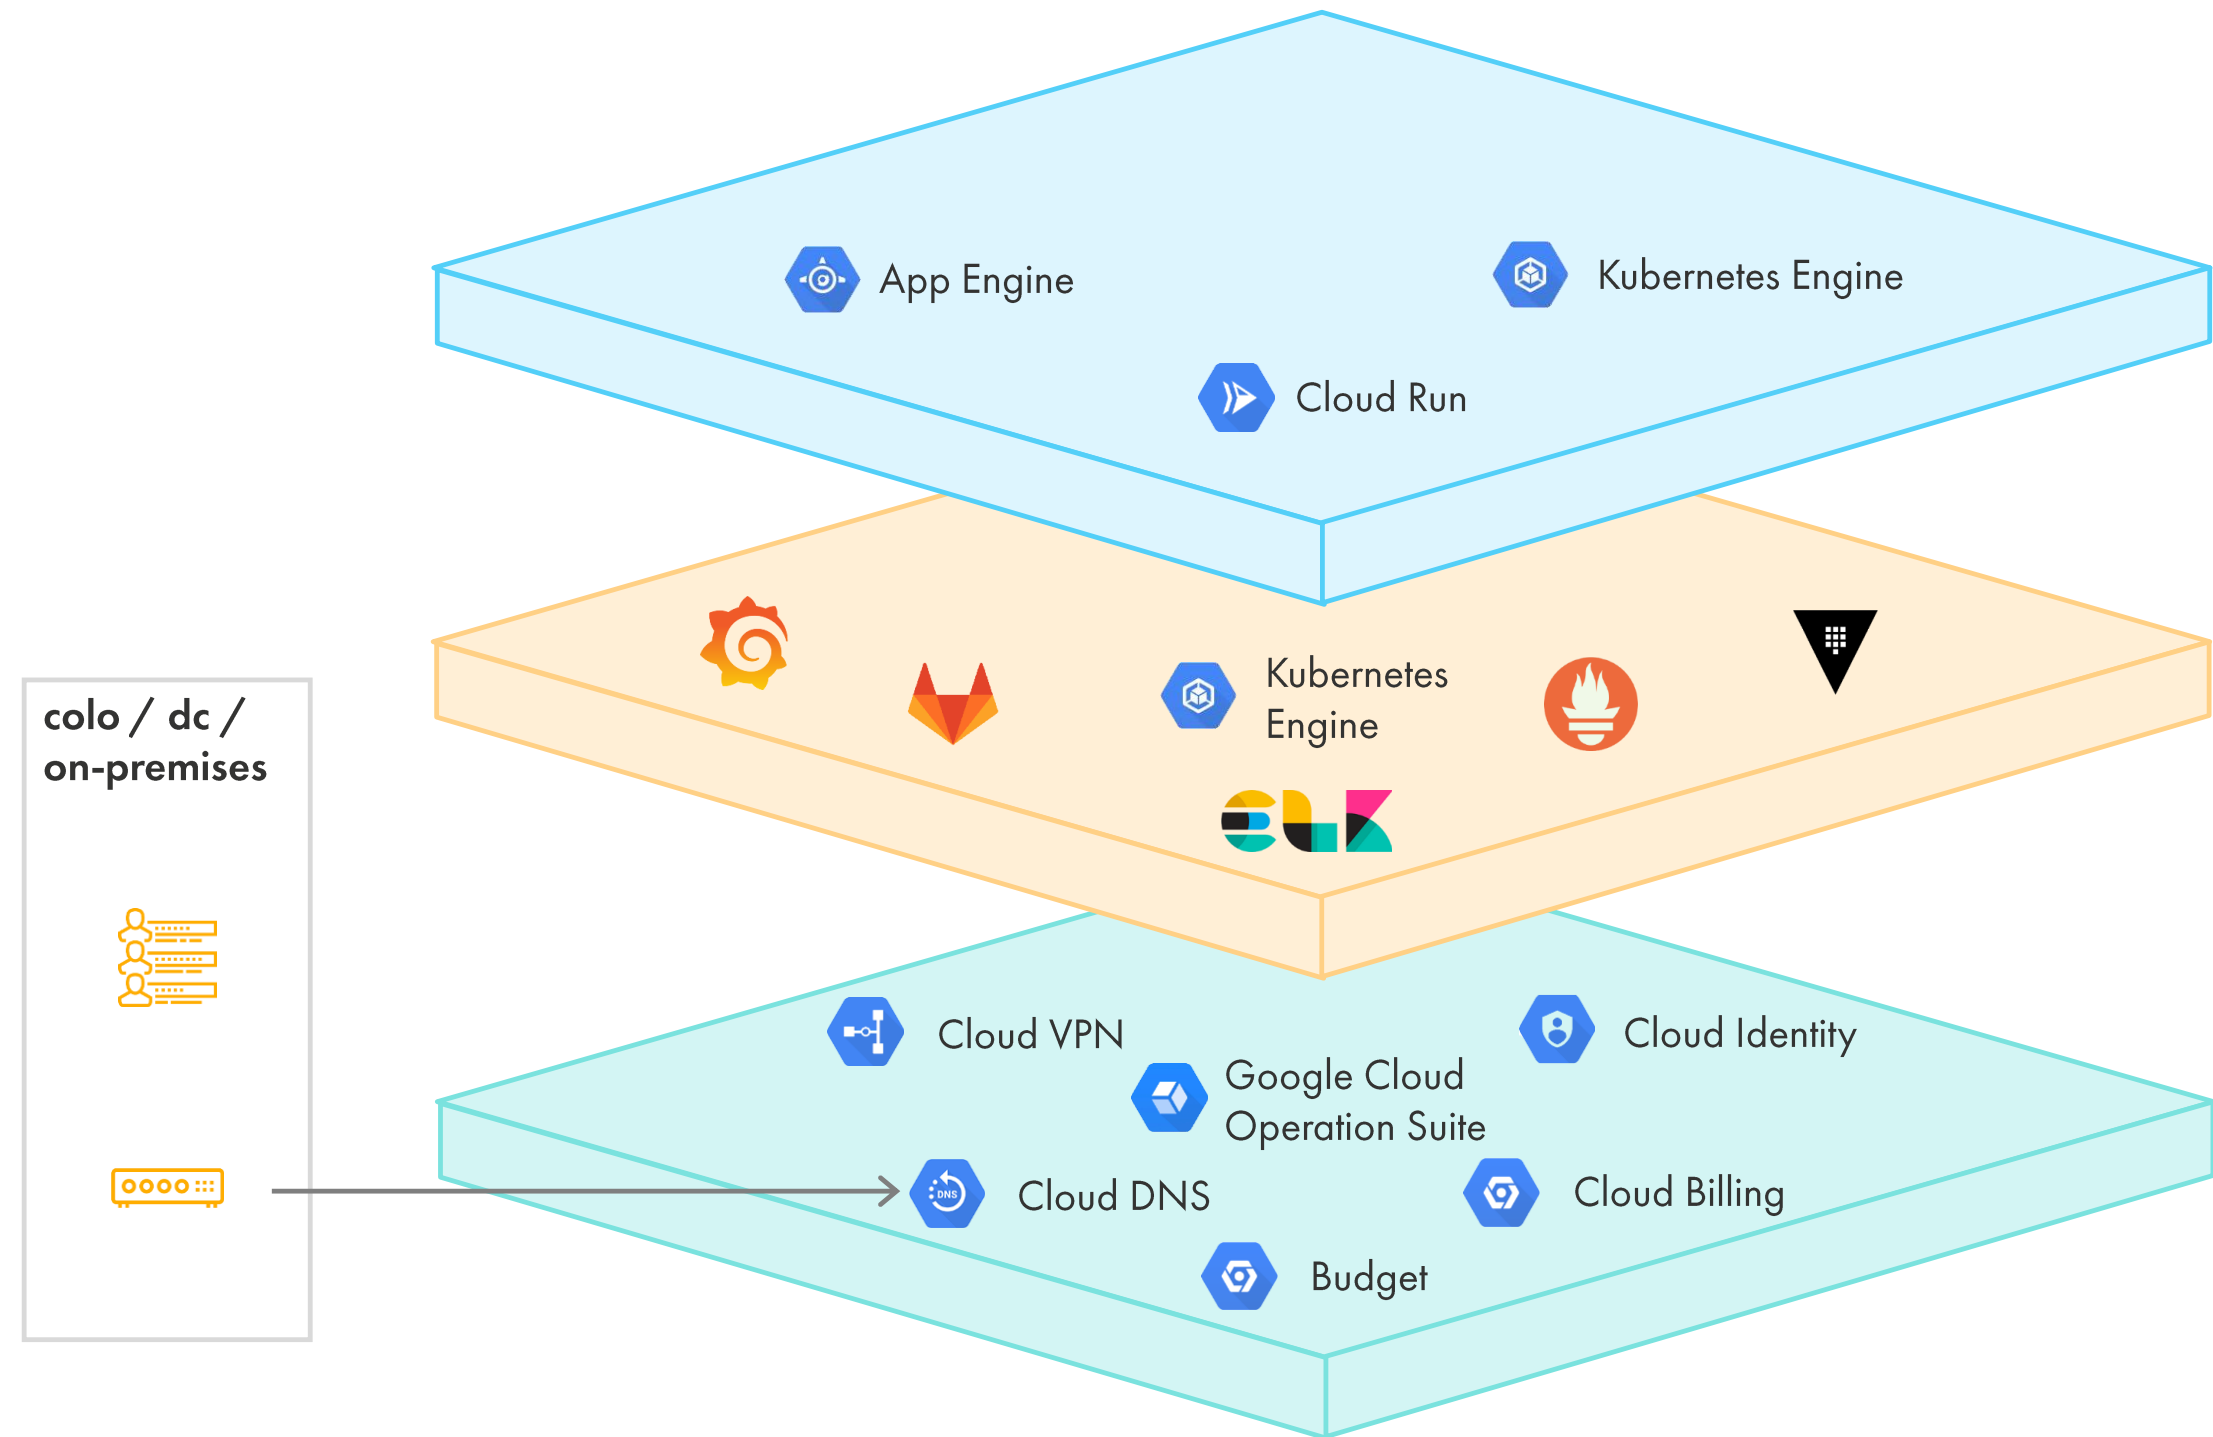

Modularity from the first day

Kubernetes from the first day

Set of referenced architectures for most popular setups

Integrated production ready tooling

Delivery Approach

Discovery

UP TO 1 WEEK

Our team of experts gather requirements, hold interviews and working sessions to deliver the client:

- Cloud governance team composition,
- Documented requirements on the Landing Zone set up

Requirements:

- Stakeholders' availability
- Access to the documentation and infrastructure (if any)

Delivery

2 – 4 WEEKS*

Automated Landing Zone templates help to provision the infrastructure resources in days.

We configure the resources in accordance with the requirements using IaC approach.

We also deliver the repository with referenced architecture for popular services set ups.

Knowledge Transfer

UP TO 1 WEEK

Our approach equips a company to evolve with the Google Cloud. We provide the customer with the referenced architectures and integrated tools.
